CALIFORNIA EPA SECRETARY ALAN LLOYD TO RECEIVE LIFETIME MEMBERSHIP FROM NATIONAL HYDROGEN ASSOCIATION

WASHINGTON, D.C - February 28, 2005 - California Secretary of the Environmental Protection Agency, Dr. Alan Lloyd will be given a Lifetime Honorary Membership into the National Hydrogen Association (NHA). "Dr. Lloyd has long been an advocate of testing the promise hydrogen holds as an environmentally clean fuel," said Jeffrey A. Serfass, National Hydrogen Association President. "Throughout his career in California, Alan has worked with the National Hydrogen Association and many others in the hydrogen and fuel cell community to move industries, policy makers, researchers and the public to an understanding that cleaner air can be possible."

"I am honored to be chosen by the National Hydrogen Association as a Lifetime Honorary Member," said Dr. Lloyd. "I have worked with the National Hydrogen Association for a number of years and am pleased to be thought of so highly by my colleagues."

In 2004, Dr. Lloyd was appointed as Secretary of California Environmental Protection Agency (CalEPA) by Governor Arnold Schwarzenegger. Lloyd's career in environmental issues spans three decades. He has been on countless boards and committees, including the U.S. Environmental Protection Agency's Clean Air Act Advisory Committee, the U.S. Department of Energy's Hydrogen Technical Advisory Panel and the National Research Council Transportation Research Boards' Committee on Alternative Transportation.

Dr. Lloyd will be presented with an award in Washington, DC during the National Hydrogen Association's 16th Annual Hydrogen Conference and Exposition where he is also a keynote speaker. The Conference, "Partnering for the Global Hydrogen Future," will be held at the Marriott Wardman Park in Washington, DC from March 29 through April 1, 2005.

Dr. Lloyd will join the distinguished company of Dr. Addison Bain who was recognized by the NHA as a Lifetime Honorary Member in 2004. Dr. Bain, a retired NASA engineer, achieved notoriety for demystifying the Hindenburg accident and proving hydrogen was not the cause.

About National Hydrogen Association

The National Hydrogen Association (NHA) is the Nation's premier hydrogen trade organization dedicated to supporting the transition to hydrogen. The members of the NHA include energy companies, automotive manufacturers, fuel cell developers, universities, laboratories and a diverse array of national and international companies which represent the ubiquitous nature of hydrogen. Efforts are focused on education and outreach, policy, safety and codes and standards. Since 1989, the NHA has served as a catalyst for information exchange and cooperative projects and continues to provide the setting for mutual support among industry, research and government organizations.
